## ABOUT AGRO'2019

### About the event

The "International Symposium on Waste Management Problems in Agro-Industries" has been held with IWA support beginning 1989 and the former nine symposia were organized under the same umbrella. It will be the 30<sup>th</sup> year of the AGRO Symposium Series with the 10<sup>th</sup> AGRO'2019 next year. As such, the symposium series has become one of the well-known IWA activities in its field.

### Who will attend

We expect AGRO'2019 to draw a large number of participants, many of whom will be IWA members. These individuals will be researchers and industry professionals interested in waste & wastewater management issues related with agricultural industries, with a focus on sustainable ways to reduce and treat agricultural wastes and other related waste streams, wastewaters, residues, and treatment sludges.
